

**We have begun to stream live bible classes online through a service called VZOchat. This software allows us to stream live to multiple computers at one time.**

**This is a free software download found at [www.vzochat.com](http://www.vzochat.com) .**

**We will be streaming our Sunday morning teaching services live each week starting at 10:30am Central Time. We will also be having other weekly classes according to the desire of the groups and the time that is most appropriate for them. Individuals are also encouraged to participate in these online services and classes.**

**The download process is very simple and once you have downloaded the software and created a USER ID, please email your USER ID to me at [cmi\\_rabon@yahoo.com](mailto:cmi_rabon@yahoo.com) . We will input your USER ID into our Address Book and when you log into the VZOchat for the service or class, we will invite you to the conference. You will receive a call when the conference begins and once you answer the call (by clicking the Green Phone that will appear at the bottom right hand corner of your computer screen) you will automatically be connected into the conference.**

**You must have a web camera (web-cam) connected if you want the full interactive experience, but it is not necessary to hear and view the services or classes.**

**Thank you for your interest in these services and classes and if you need any further assistance, please contact me at the email.**
